

Most data breaches are caused by compromised customer credentials, weak authorisation, and poor access control implementations. NordicHub Access Control is a SaaS-based Identity & Access Management (IAM) solution that lets you rapidly embed strong, proven customer identity management capabilities into your applications to improve security posture without distracting your developers away from your core business.

Grow your business by unlocking the full potential of digital identity.

Organisations use our identity platform to quickly implement use cases like single sign on (SSO), Multi-factor authentication (MFA), Access management, Authorisation and consent policies.

NordicHub Access Control offers a full suite of identity management capabilities for any cloud, on-premises or hybrid environment and enables identity centric Zero Trust architectures. This improves the security and experience of how users authenticate, register, access, engage and use the organisation's application, whether it's a web, mobile or legacy service.

Effective Identity and Access Management is prerequisite to a successful digitalisation strategy and essential against the rising threat of data breaches.

NordicHub Access Control means your developers can focus on building better, secure applications, and to reduce time to market at a lower cost.

NordicHub Access Control's key features:

- Frictionless, but secure, registration, login and engagement experience between applications.
- Use of existing Bring Your Own Identity for easy authentication + MFA.
- Self-service increases application of use.
- Consistent access management applied across all systems.
- Reduce breach risk by extending authentication & authorisation IAM principles to external users.
- Helps address key EU and global customer security, privacy, consent and data protection regulation.
- Hosted in Sweden, by Swedish personnel.

ONE PLATFORM TO INTEGRATE TRUSTED IDENTITY AND ACCESS MANAGEMENT INTO CUSTOMER AND WORKFORCE APPLICATIONS.

QUICKLY BUILD SECURE, SEAMLESS AND ENGAGING USER EXPERIENCES
